FARM PRODUCTION, DISPOSITION, AND INCOME FROM MILK 1935-39 1/

-- Contents --

Page

Summary tables for selected items showing annual data by states, 1924-41. (Includes revised estimates for years 1934-39)

Number of milk cows on farms	. 14-15
'Annual milk production per cow	. 16-17
Milk produced on farms	. 18-19
Butter churned on farms	20-21
Cash farm income from dairy products	22-23
Value of dairy products consumed on	
farms where produced	. 24-25
Gross farm income from dairy products	
ailed tables showing farm production, of milk,	
butterfat and outter; disposition of milk pro-	

Detailed tables showing farm production, of milk, butterfat and outter; disposition of milk produced; and quantity, price and value of dairy products sold from farms, by states

1935	·														28-31

1937															36-39
1938				•										•	40-43
1939			•		•		•		•			•	•	. •	44-47

Prepared as a supplement to "Farm production, disposition, and income from milk 1940-41," the tables included here show revised estimates for the years 1935 through 1939. In accord with the usual practice, the estimates previously issued for this period have been trued up on the basis of the new information on production and sales of dairy products obtained by the 1940 Census of Agriculture enumeration. In comparison with carlier estimates for these years, the revised figures show a slightly lower farm production of milk and putter, somewhat smaller amounts of milk, cream and putter used on farms where produced, and some changes in the amounts of various products sold from farms. Detailed estimates for years prior to 1935, are available in "Farm production, disposition, and income from milk 1924-40" (mimmeograph), Agricultural Marketing Service, U.S.D.A., May 1941, which may be obtained from the Bureau of Agricultural Economics upon request.

^{1/} Propared by John L. Wilson, Agricultural Statistician, Bureau of Agricultural Economics.

^{1/} Computed from the value of milk, cream and farm butter sold divided by the quantity of milk or butterfat used in the preparation of these products for market.

^{2/} Milk and milk equivalent of cream and farm butter consumed, valued at the average returns for milk utilized in dairy products sold.

				_'''			'		

Computed from the value of milk, cream and farm butter sold divided by the quantity of milk or butterfat used in the preparation of these products for market.

^{2/} Milk and milk equivalent of cream and farm butter consumed, valued at the average returns for milk utilized in dairy products sold.

Computed from the value of milk, cream and farm butter sold, divided by the quantity of milk or butterfat used in the preparation of these products for market.

^{2/} Milk and milk equivalent of cream and farm butter consumed, valued at the average returns for milk utilized in dairy products sold.

^{3/} Milk and milk equivalent of cream and farm butter consumed, valued at the average returns for milk utilized in dairy products sold.

^{4/} Value of combined sales plus value of products consumed in the farm household.
